PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience designing and delivering scalable, secure microservices and REST APIs using Java, Spring Boot, and AWS. Proven track record building resilient APIs, optimizing performance with asynchronous patterns, and automating CI/CD pipelines with DevSecOps quality gates — backed by hands-on production support (hotfixes, incident triage) and Agile delivery.

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Core Java, Spring WebClient, Spring Data JPA, Spring Security, REST APIs, Microservices, SOAP, CompletableFuture, JUnit, JaCoCo, Maven, SQL, Python

Cloud & Infrastructure: AWS (ECS, ECR, ALB), OpenShift Container Platform, Linux, JBoss

DevOps & CI/CD: Docker, Terraform (IaC), Jenkins, AWS CodePipeline, CI/CD Pipelines, uDeploy, Shell Scripting, Autosys

Databases & Caching: Oracle, PostgreSQL, Redis, JDBC

Security & Quality: OAuth2, JWT, HashiCorp Vault, AWS Secrets Manager, SonarQube, Checkmarx (SAST), Nexus IQ

Observability & Tools: Dynatrace, Splunk, Git, Postman, IntelliJ IDEA, JIRA, Agile/Scrum

Frontend (Working Knowledge): Angular, HTML, CSS, JavaScript, TypeScript

PROFESSIONAL EXPERIENCE

Software Engineer | Cognizant Technology Solutions, Chennai, TN

Jul 2025 – Present

Group Benefits (Insurance / Financial Services) platform serving enterprise clients

- Developed and maintained 10+ **Java Spring Boot microservices** using **RESTful API** design and **layered architecture** (Controller, Service, DAO, Repository, Entity), supporting enterprise Group Benefits clients in a financial-services domain.
- Architected inter-service communication with **Spring WebClient** through a centralized **shared library**, standardizing **HTTP** request/response handling across all 10+ services and eliminating duplicated integration boilerplate.
- Optimized API response times by parallelizing independent downstream calls with **@Async** and **CompletableFuture**, replacing sequential blocking calls with concurrent **non-blocking** execution.
- Deployed containerized microservices on **AWS ECS** with **auto-scaling** (min 2 / max 6 tasks) and configured **AWS ALB** with round-robin **load balancing**, session stickiness, and health checks, enabling **zero-downtime** deployments.
- Engineered multi-stage **CI/CD** pipelines with **Jenkins**, **AWS CodePipeline**, and **Terraform**, enabling fully automated **infrastructure-as-code** deployments from commit to ECS.
- Implemented **Redis distributed caching** as a shared cache layer across microservices, reducing repeated external API calls and improving response times for frequently requested data.
- Hardened application security by managing secrets and runtime configuration through **HashiCorp Vault** and **AWS Secrets Manager**, eliminating hardcoded credentials across services.

Junior Software Engineer | Cognizant Technology Solutions, Chennai, TN

Oct 2022 – Jun 2025

Java 8 / Spring Boot API development, batch processing, and production support

- Built high-performance **REST APIs** with **Java 8**, **Spring Boot**, and **Oracle/PostgreSQL**, backed by **JUnit** and **JaCoCo** coverage, handling thousands of daily requests at sub-200ms latency.
- Automated a recurring **Java** batch job with **Linux shell scripting** and integrated it into **Autosys** for scheduled execution, removing manual intervention and ensuring reliable unattended runs.
- Provided **production support** across the release cycle — **hotfixes** and **incident triage** — diagnosing issues in lower environments before promoting validated fixes to production.
- Performed root-cause analysis using **Splunk** and the **JBoss** console for log analysis and **Dynatrace** for performance monitoring, resolving application defects before release.
- Improved code quality by 25% via **SonarQube** standards and remediated critical/high-severity vulnerabilities by 30% using **Checkmarx (SAST)** and **OWASP** best practices.
- Implemented **Tealium Analytics** event tracking in **Angular** UI components to capture user-interaction metrics for product and feature-usage insights.

EDUCATION & CERTIFICATIONS

B.E. Electronics & Communication, Panimalar Engineering College, Anna University 2018 – 2022

AWS Certified Cloud Practitioner — Amazon Web Services
